

Simdulich.vn

Giao dien React (dieu huong theo tab) + backend Node.js/Express — he thong van hanh eSIM / SIM du lich.

Cau truc du an

Thu muc	Mo ta
frontend/	Vite + React + TypeScript (UI Simdulich.vn)
backend/	Express proxy + SHA1 encStr + webhook nhan callback
backend/data/	Luu tru JSON (users.json, orders.json) — khong commit git

Cai dat

```
copy .env.example .env
# Sua WORLDMOVE_MERCHANT_ID, WORLDMOVE_DEPT_ID, WORLDMOVE_TOKEN trong .env

npm install
npm install --prefix frontend
npm install --prefix backend
```

Chay dev:

```
npm run dev
```

UI: http://localhost:5173 API: http://localhost:4000

Quan tri & phan cap gia

Cap	Vai tro	Tab hien thi
admin	Quan tri — gia goc NT	Cau hinh, Quan tri, Bao gia, eSIM, Redeem, SIM vat ly, Nap tien, Tra cuu, We
tong_kho	Tong kho — gia + markup	Dat eSIM, Dat SIM vat ly, Quan ly dai ly
dai_ly	Dai ly — gia + markup	Dat eSIM, Dat SIM vat ly

Tai khoan mau

Dang nhap	Mat khau	Markup
admin	admin123	0% (gia goc)
tongkho	tongkho123	3%
daily	daily123	8%

Admin co the:

- Chinh ty gia NT->VND va markup mac dinh theo cap (tab Quan tri)
- Chinh markup % rieng tren tung tai khoan (blur o input trong bang)
- Tao tai khoan Tong kho moi (tab Quan ly dai ly)

Tong kho co the:

- Tao tai khoan Dai ly cua rieng minh (tab Quan ly dai ly)
- Chinh markup % va khoa / mo khoa tung dai ly cap duoi
- Xem toan bo don hang do dai ly thuoc nhanh minh tao

Luu y: Tong kho 1 chi thay don tu dai ly ma chinh no tao ra (phan vung rieng biet giua cac tong kho).

API phan quyen quan ly

Endpoint	Phuong thuc	Mo ta
/api/manage/users	GET	admin: tat ca users; tong_kho: danh sach dai ly truc tiep
/api/manage/users	POST	admin tao tong_kho; tong_kho tao dai_ly
/api/manage/users/:id	PATCH	Cap nhat markupPercent / active / password (chi con truc tiep)
/api/orders	GET	Tra don theo cap bac (admin: tat ca; tong_kho: nhanh; dai_ly: cua minh)
/api/orders	POST	Luu don eSIM sau khi dat thanh cong

Webhook (cau hinh tren cong API nha cung cap)

Tro ve may ban (can expose public, vi du ngrok):

API	Path
2.2 eSIM Order Callback	POST /webhooks/worldmove/esim-order
2.5 eSIM Order & Redeem Callback	POST /webhooks/worldmove/esim-order-redeem
3.2 Redeem Callback	POST /webhooks/worldmove/redeem
5.2 Top-up Callback	POST /webhooks/worldmove/topup

Backend bat buoc tra ve chuoi "1" (da implement).

Luu y nghiep vu da validate o UI + server

- eSIM: tong qty <= 20, san pham leSIM=true (khi chon tu bao gia)
- Nap tien: day <= 30, toi da 500 dong, khong trung simNum
- simExists: simNum dung 20 chu so
- SIM vat ly: taxId va note bat buoc (co the chuoi rong)
- E-commerce Order: tu dong dien ten_tk + gia tri nhap (vi du: tongkho_DH001)
- Company: admin co the sua tuy y; tai khoan con tu dong khoa theo username
- Thoi gian don hang: dung gio Taipei UTC+8 (khop voi Worldmove)

Ghi chu: Thay doi placeholder E-commerce Order tren Worldmove Admin UI

Field E-commerce Order trong giao dien Worldmove (receiverEcid) hien thi placeholder lay tu key da ngon ngu ecommerceOrder.

Cach 1: Sua truc tiep trong HTML

```
<input type="text" maxlength="50" name="receiverEcid_esim"
      ng-model="form.receiverEcid" class="form-control"
      id="inputEcid" placeholder="Worldmove Order" style="">
```

Lưu ý: Xóa ng-attr-placeholder để Angular không ghi đè lại giá trị cũ.

Cach 2: Sua qua file ngon ngu (khuyen dung)

```
// en.json
{ "ecommerceOrder": "Worldmove Order" }

// vi.json
{ "ecommerceOrder": "Đơn hàng Worldmove" }
```
